Fragrance Story by LUZI

A fragrance that feels like an endless escape. Creamy coconut and fresh marine notes open with a breeze of sunlit freedom. At the heart, delicate peony adds a soft floral glow to the fragrance. The base melts into sweet tonka bean and smooth sandalwood, leaving a warm and comforting trail. A scent for endless summer vibes.

How Perfume Pearls™ Work

Microcaps' water-based Perfume Pearls™ technology is a revolution in the fine fragrance market. For the first time it is possible to create high-quality perfume formulations that come without ethanol, VOCs and emulsifiers and are safe for skin.

The alginate Perfume Pearls™ break when sprayed, releasing a fine mist of fragrance and water on skin. The application feels soothing and refreshing on skin without the oily, milky feeling which other, emulsion-based formulations bring. Perfume Pearls™ encapsulation works best with oil-soluble fragrance concentrates. It enables brands to encapsulate their signature fragrances to create a completely new product innovation which hasn't been seen before.

7 Key Benefits

- Free from ethanol
- No emulsifiers
- Vegan and safe for skin
- Soothing, refreshing and non-sticky
- Luxurious visual appearance
- Long lasting, balanced olfactory performance
- Patented technology
